We produce individual foam inserts for your equipment

There are no limits when it comes to developing and designing your individual shadowboard. No matter what your requirements are, myLean will produce the perfect shadowboard for you. myLean shadowboards are made of one- or two-coloured foams. The Two-colour system allows the user to immediately identify missing tools or workpieces. The myLean shadowboards comply with international lean standards. Thanks to the customised production method, shadowboards can be used for a wide variety of applications.

**3D- printed inlays
by contract manufacturing**
We are also happy to manufacture
individual 3D-printed parts according
to your specifications!

Customized 3D-Printed inlays (filament print)

Our 3D-Printed inlays offer customized solutions with individual shapes, sizes and structures, perfectly tailored to your requirements. Thanks to the latest 3D-printing technology, you have almost unlimited design and color options. The precisely manufactured sleeves and recesses ensure optimal organization of your tools and accessories. High-quality materials also ensure robust and durable quality, ideal for intensive use.

- Size bis 650 x 650 x 350 mm (L,W,H)
- Material: PETG
(other plastics on request)
- Individual adaptability
- Wide range of colors
- Durability and robustness
- ESD material possible
- Weight saving due to honeycomb structure
- Cost-efficient

Simply put together your individual 3D-Printed inlays

myLean creates the 3D-Printed inlays in the Colours:

black, blue-black, green-black, red-black, yellow-black, grey-black and black-ESD

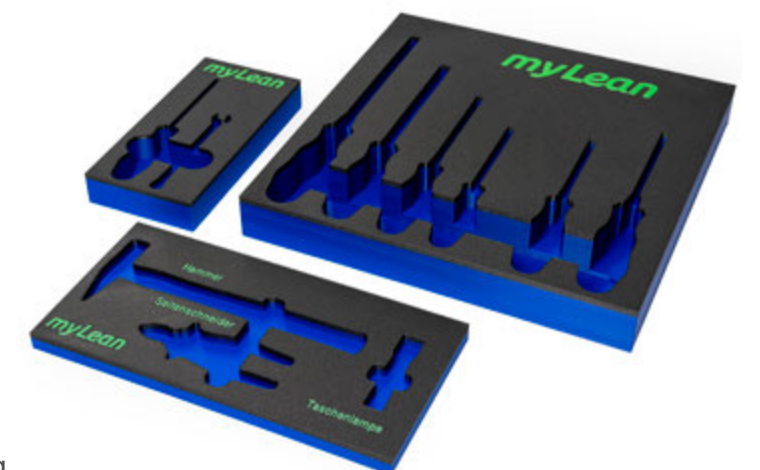

Heights:

0-350 mm freely selectable

Other colours or insert heights on request.

The 3D-printed inlays can be customized by you.

There are also no limits when it comes to labeling.

Secure and organised storage with our Shadowboards

With our 10 years of experience in foam processing, we are the perfect partner in the realization for customers from every sector. myLean produces approx. 30,000 foam inserts every year.

Alternative 1

You rent our mobile scanner

Alternative 2

You buy our mobile scanner

Alternative 3

You send us your tools by parcel service and we scan them

Alternative 4

A myLean employee visits to you with our mobile scanner and scans your tools on site

Alternative 5

You send us the CAD production data of your tools

Shadowboards from experts

We have the exact and best solution for every wish. Our specialist staff will scan your products with millimeter precision and create your chosen shadowboard. We are happy to come to your company for scanning or you can send us your products for scanning. With our shadowboards you can create a new sense of order and cleanliness at every individual workstation.

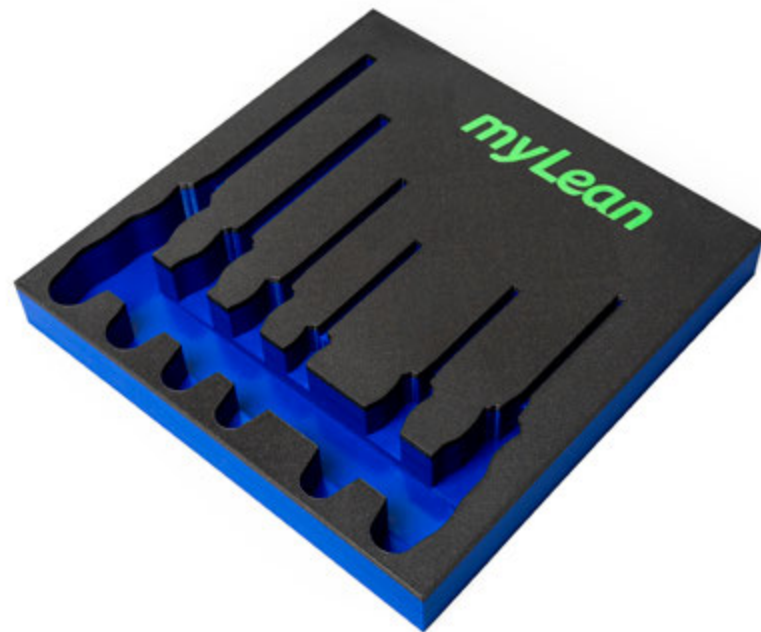

Inlays for drawers

Shadowboards for your tool cabinets, tool trolleys and workstations for a better structure and overview.

3D-Printed inlays

Portable 3D printed inlays offer robust and durable applications. The 3D printing process enables lightweight but stable structures through optimised material usage and complex designs.

Hard plastic inlays

Hard plastic inlays are ideal for clean-rooms and workstations with high access frequency. Where foam shadowboards reach their limits, hard plastic inlays offer a real alternative.

They are abrasion-resistant, oil-resistant and water-resistant, which means they can also be cleaned in the dishwasher. No deformation due to the high density of the material.

5S Shadow glue

Ideally suited for perforated boards or walls. Missing and incorrectly positioned tools or other utensils are immediately visible and access times are reduced. The shadow stickers are applied by simply peeling off the backing paper and sticking them in the desired position.

5S Shadow magnet

Ideally suited for all magnetic surfaces. Missing and incorrectly positioned tools or utensils are immediately visible and access times are reduced. The shadow magnets are simply attached to the desired magnetic location.

Mobile Scanner

Simply put together your own customised shadowboard, hard plastic inlay, shadow adhesive or shadow magnet. All you need is the mobile scanner from myLean.

contents: LED light panel, digital camera, digital operating instructions, USB stick with Shadowboard-Creator, connection cable, USB data cable, free software

Item-No. 10001005

Mobile XXL-Scanner

Simply put together your own customised shadowboard, hard plastic insert, shadow adhesive or shadow magnet for particularly large workpieces. All you need is the mobile XXL scanner from myLean.

Contents: LED light panel, digital camera, digital operating instructions, USB stick with Shadowboard-Creator, connection cable, USB data cable, free software

Item-No. 10002257

Photo accessories for scan unit

Razor-sharp pictures with the photo accessories for professional use

Contents: High-resolution industrial camera, camera software, remote release (Items may differ from the picture)

Item-No. 10002115

Professional scan unit

Use the practical professional scanning unit as a stand-alone solution with an integrated holder for the high-resolution industrial camera (can be purchased separately). Shadows are minimised by the housing and the holder for the high-resolution industrial camera is installed at the optimum distance so the best possible scanning results are achieved. Thanks to the remote shutter release and digital data transfer you can easily photograph and scan your tools from your desk. With our Shadowboard-Creator, you can create your own shadowboards and adapt them to suit your requirements.

Contents: Aluminium photo booth measuring 800 x 800 x 2000 mm.

Consisting of: myLean LED light panel, user manual, USB stick with myLean Shadowboard-Creator, cable

Item-No. 10002114

Mobile tripod

You can photograph your tools, small parts or other objects anywhere, quickly and without blurring. The mobile tripod from myLean has a holding device for the camera and the mobile scanner.

Due to the fixation of the camera and the predefined distance the accuracy and quality of the shadowboards is extremely increased. When folded, the stand serves as a transport trolley for the scanner. The wheels are ESD-compatible.

Item-No. 10001006

Suitcase inlays

The myLean foam inserts are customised and manufactured to the exact dimensions and requirements of your case. Each element is custom cutted so that it fits perfectly into the case and your tools or equipment are optimally protected and organised.

(Item-No. – Customised)

Hanging tray

The myLean hanging tray is used as a mobile picking and goods tray or as a mobile measuring equipment tray directly at the measuring station or workstation. Thanks to the brackets attached on both sides, the mobile hanging tray can be hung practically anywhere.

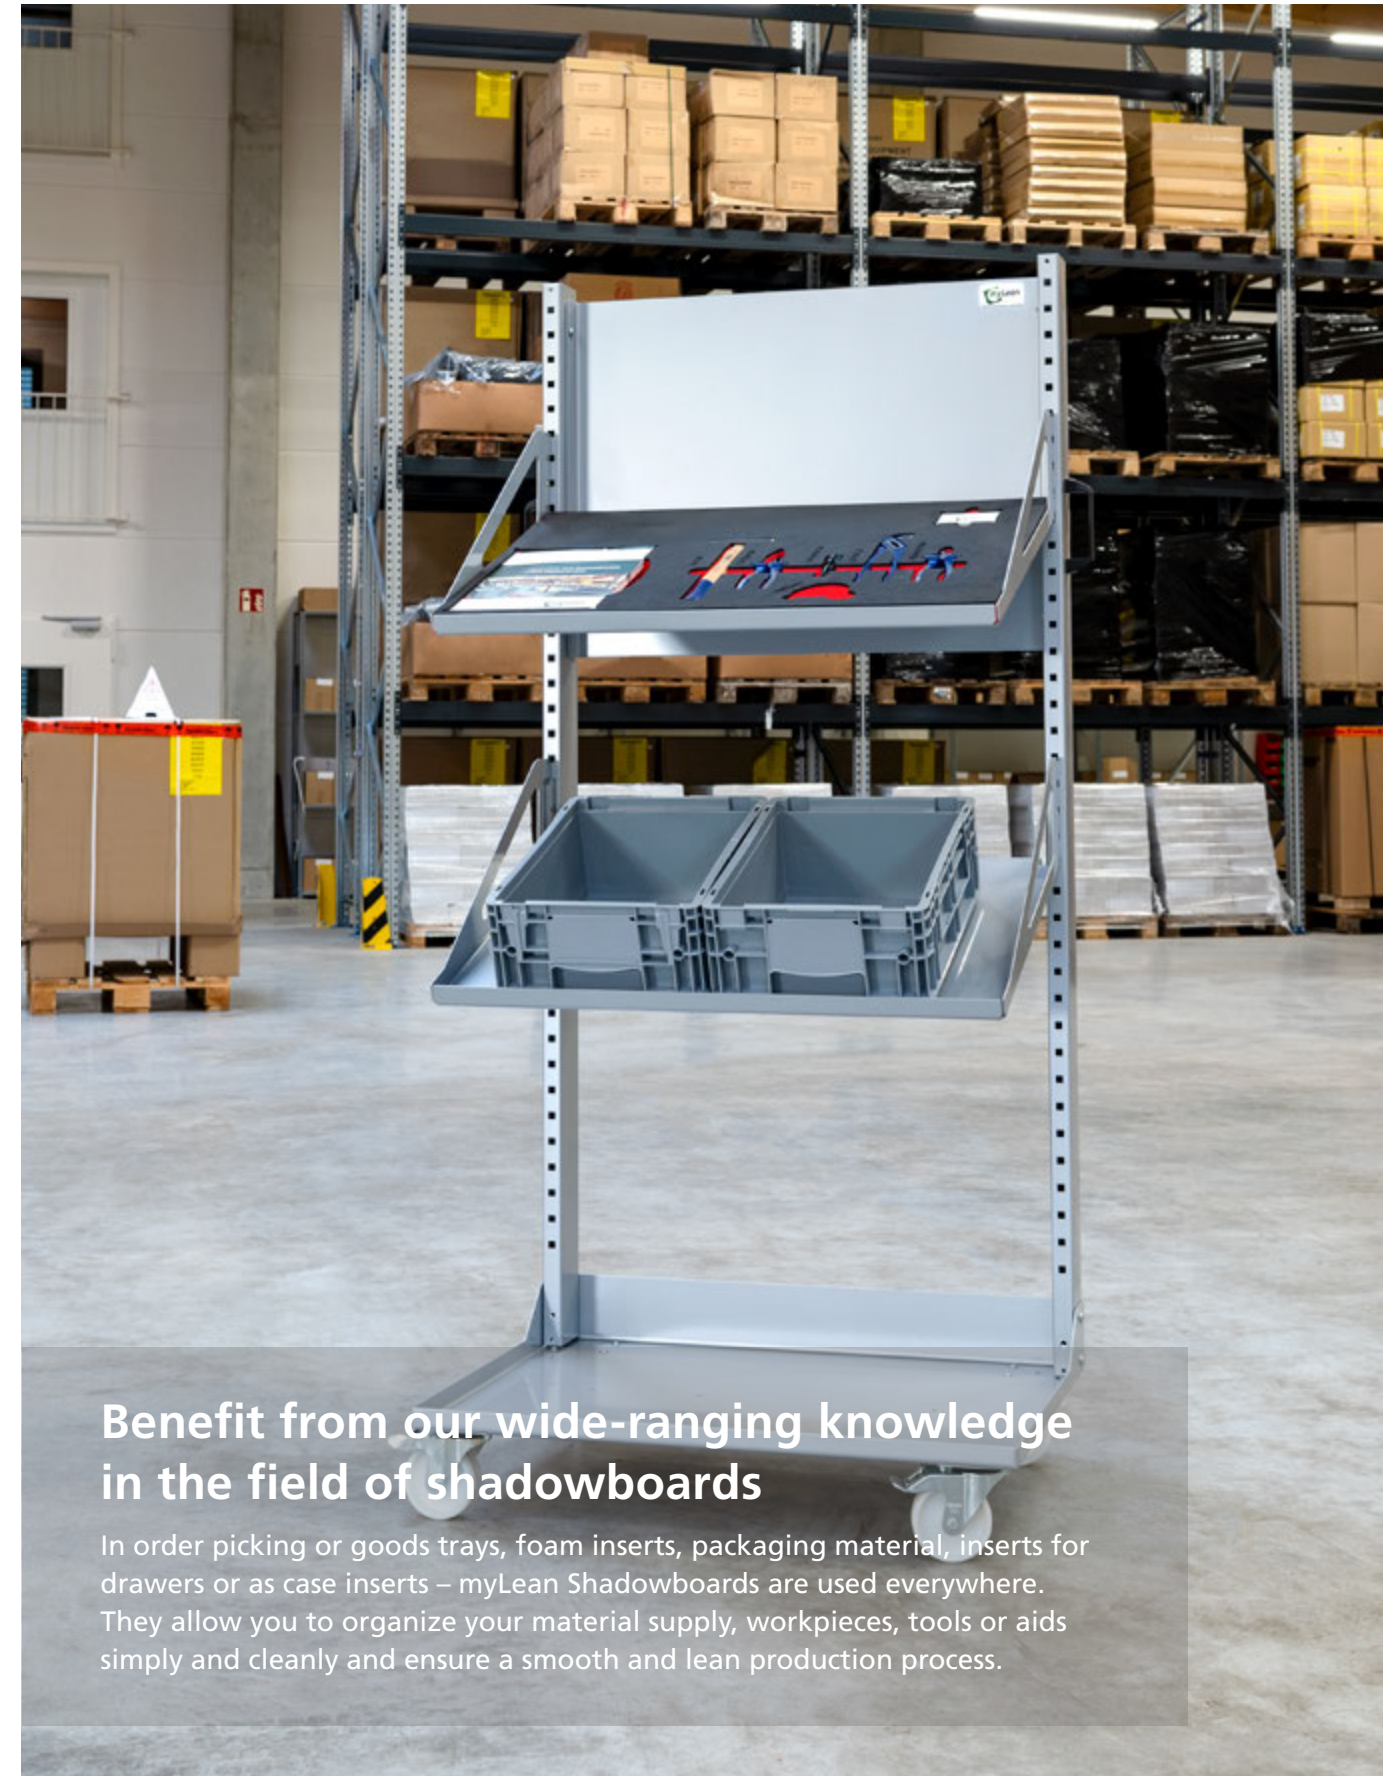

ca. 400 x 200 x 95 mm
Item-No. 30001104 (Alu red)

Product tray

myLean product trays are used for many different applications. Perfect for the provision of tools, as an exchangeable insert for drawers, for material provision or for targeted tool dispensing to your employees. The goods trays can be stacked on request and therefore they are very space saving. They are manufactured to customer specifications in various lengths and widths.

(Item-No. – Customised)

Benefit from our wide-ranging knowledge in the field of shadowboards

In order picking or goods trays, foam inserts, packaging material, inserts for drawers or as case inserts – myLean Shadowboards are used everywhere. They allow you to organize your material supply, workpieces, tools or aids simply and cleanly and ensure a smooth and lean production process.

— The station for all areas

The myLean cleanTower – High quality & centrally located

The myLean cleanTower guarantees tidiness and cleanliness in all areas of the workplace. Whether in production or logistics, the myLean cleanTower offers plenty of space for all important cleaning utensils. It impresses with its variety of colours, clever equipment and modern design.

myLean cleanTower

The myLean cleanTower guarantees tidiness and cleanliness in all areas of the workplace. Whether in production or logistics, the myLean cleanTower offers plenty of space for all important cleaning utensils. It impresses with its variety of colours, clever equipment and modern design.

The myLean cleanTower is made of high-quality steel. With a height of 191 cm and a width of approx. 16 cm, it weighs approx. 25 kg including equipment. The 40 cm round base plate guarantees optimum stability. Our mobile myLean clean-Tower is available on request.

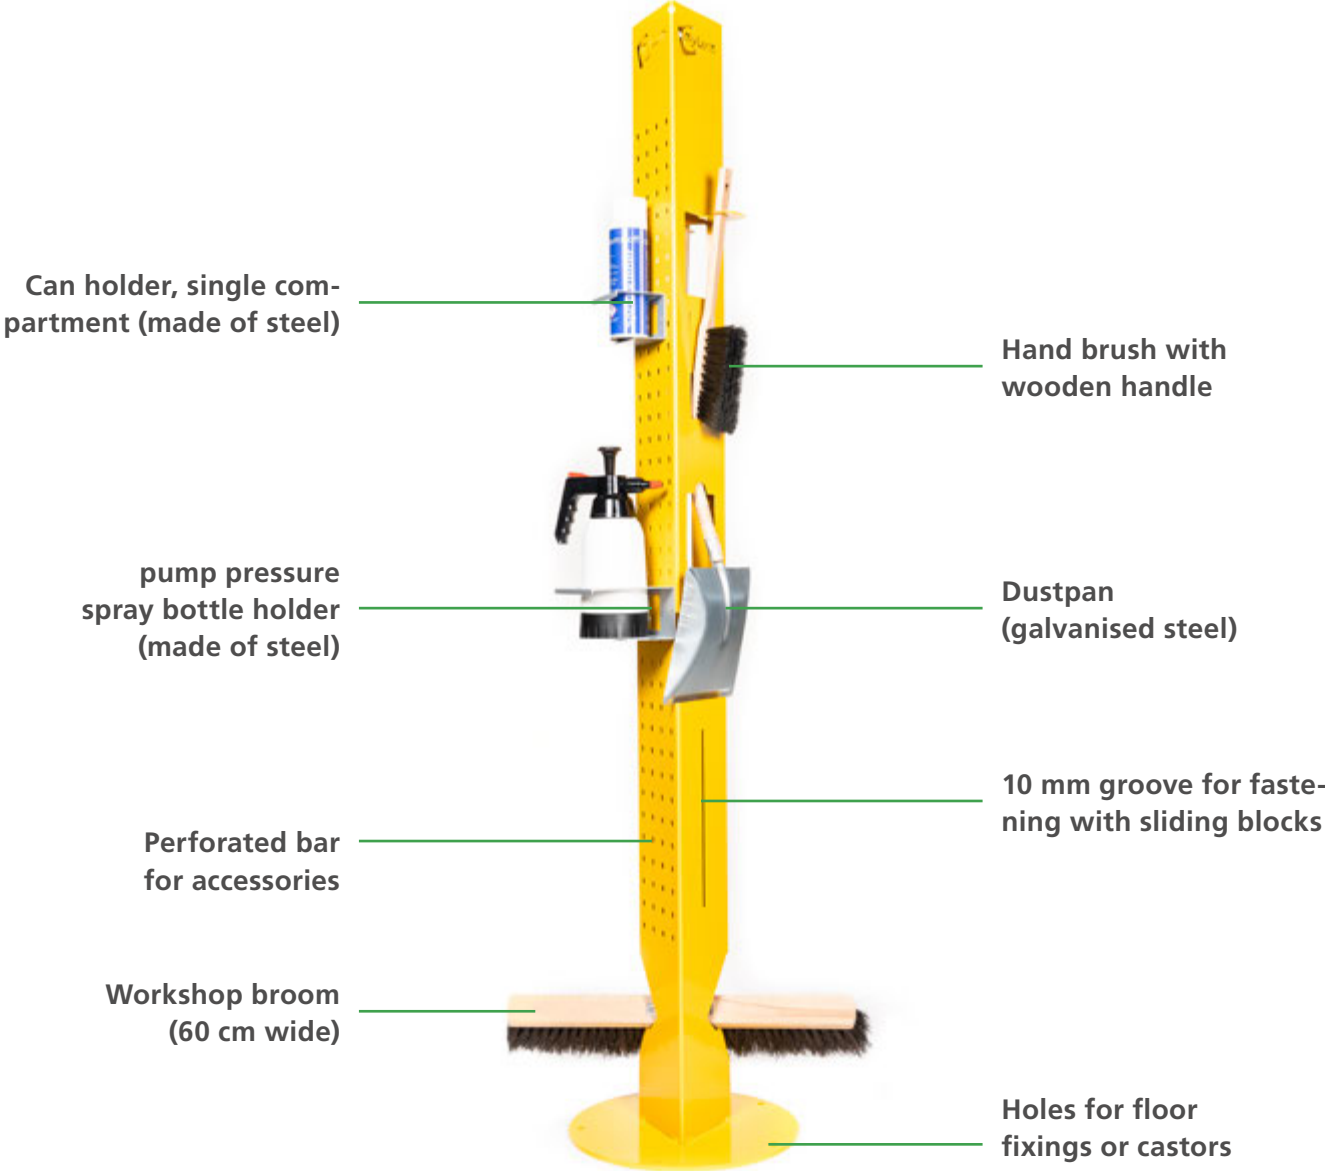

The myLean cleanTower –
Eye-catcher guarantee

You can also simply order your myLean cleanTower in the colour of your choice. The steel is powder-coated in the colour of your choice (available from 6 pieces).

Colour options
Our standard colours are:
black | red | yellow | silver

Features	
Item-No.	10001004 black 10001000 red 10001003 yellow 10001002 silver
Weight	25 kg
Measurements	191 cm x 16 cm x 40 cm
Accessories (included)	Broom, pump pressure spray bottle, dustpan, hand brush
Miscellaneous	5 holes in base plate for floor fixings or castors

myLean cleanTower Flexi

The myLean cleanTower Flexi is ideal for all areas where different cleaning accessories are required. Whether in production, assembly, quality control, outgoing goods or other areas of the company, the myLean cleanTower Flexi can be customised and assembled to your individual requirements thanks to its clever modular design.

The myLean cleanTower Flexi is made of high-quality steel. The 40 cm round base plate guarantees optimum stability. The side of the myLean cleanTower Flexi has a perforated bar to which the accessories for the myLean cleanTower Flexi can be attached. Our mobile myLean cleanTower Flexi are available on request.

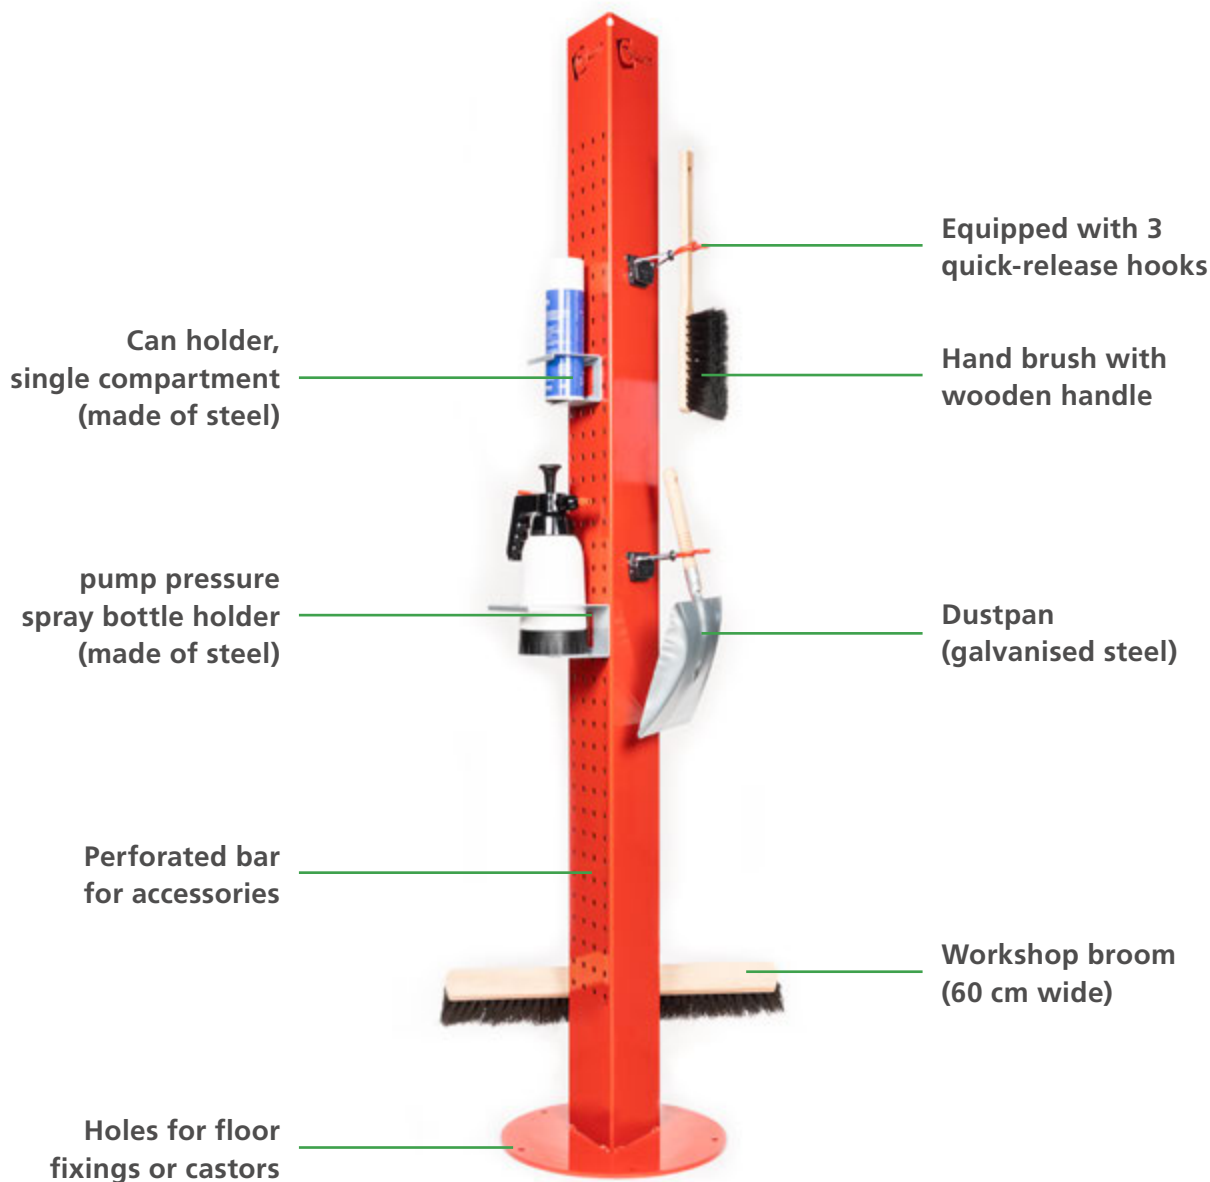

The myLean cleanTower Flexi –
The flexible solution for tidiness and cleanliness

You can also simply order your myLean cleanTower Flexi in the colour of your choice. The steel is powder-coated in the colour of your choice (available from 6 pieces).

Colour options
Our standard colours are:
black | red | yellow | silver

Features	
Item-No.	10001044 black 10001043 red 10001046 yellow 10001045 silver
Weight	25 kg
Measurements	190 cm x 16 cm x 40 cm
Accessories (included)	Broom, dustpan, hand brush
Miscellaneous	5 holes in base plate for floor fixings or castors

myLean cleanTowers Quick

The myLean cleanTower Quick offers you a quick and flexible solution for storing your individual cleaning utensils. No matter in which area of the company, the myLean cleanTower Quick impresses with its three quick-release hook for effortless attachment of cleaning accessories.

myLean cleanTower Quick can be combined with the appropriate accessories to create a customised myLean cleanTower Quick to suit your requirements and wishes.

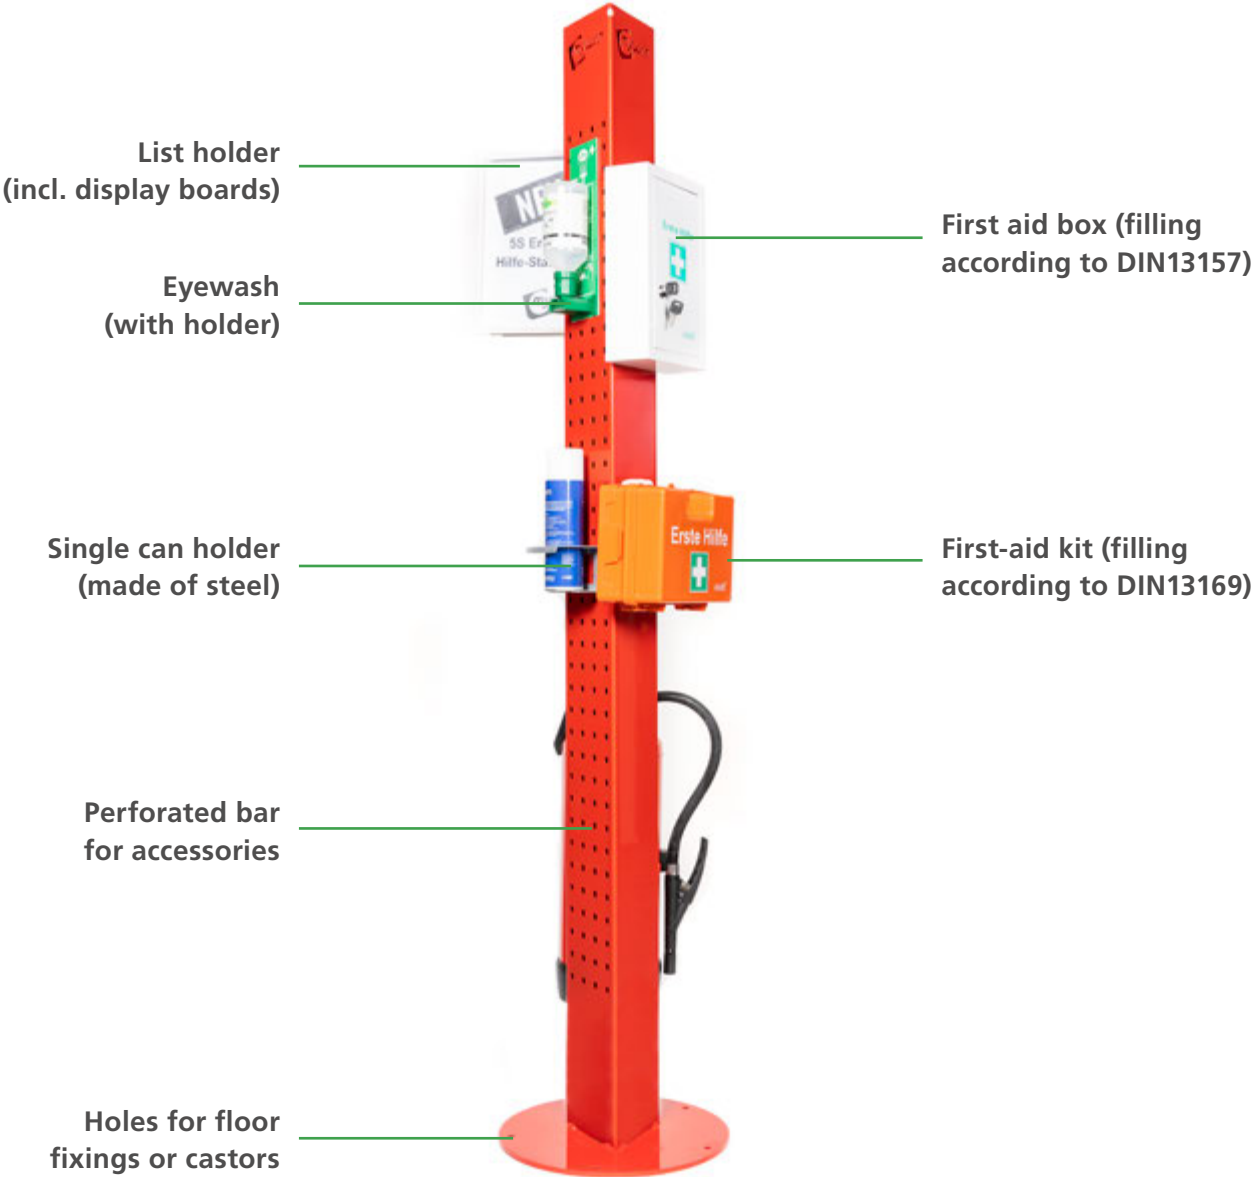

The myLean cleanTower Quick – Quick and flexible for more order and cleanliness

You can also simply order your myLean cleanTower Quick in the colour of your choice. The steel is powder-coated in the colour of your choice (available from 6 pieces).

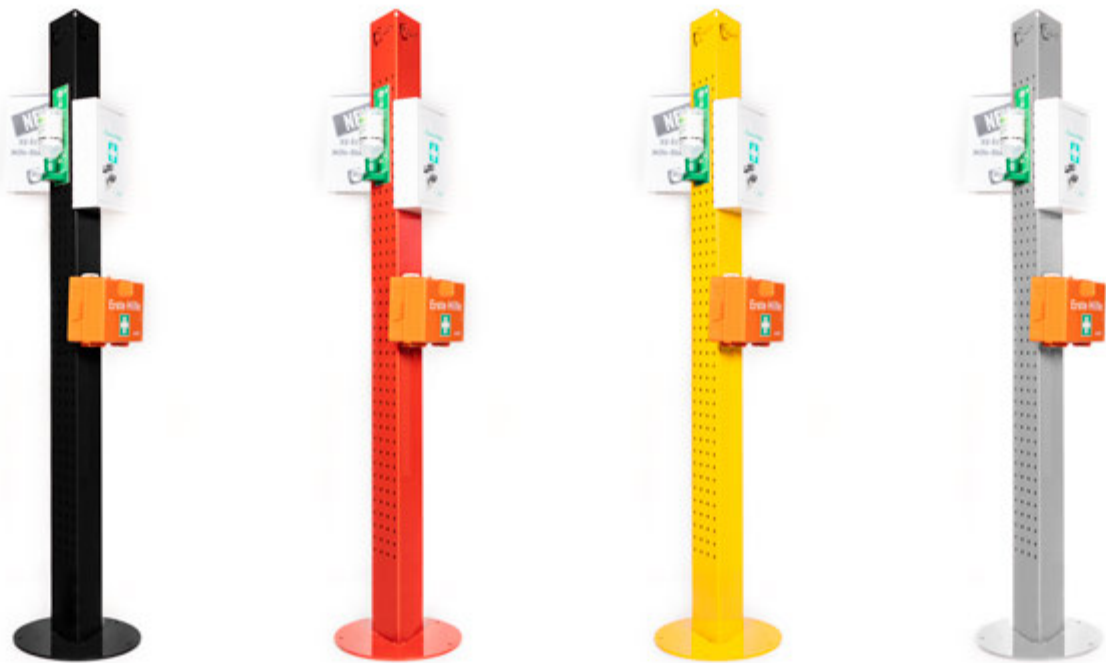

Colour options
Our standard colours are:
black | red | yellow | silver

Features	
Item-No.	10001099 black 10001100 red 10001102 yellow 10001101 silver
Weight	25 kg
Measurements	190 cm x 16 cm x 40 cm
Accessories (included)	Broom, dustpan, hand brush
Miscellaneous	5 holes in base plate for floor fixings or castors

myLean First-AidTower

The first aid station from myLean is ideal for all areas of the company. It impresses with its variety of colours, modern design and space-saving equipment options. The 40 cm round base plate guarantees optimum stability. The first aid station also has a perforated bar on the side, to which our cleanTower accessories can be optionally attached or an eye spray bottle incl. holder (item no.: 30004145).

The myLean First-AidTower – Quick and easy handling in case of accidents

You can also order your myLean First-AidTower in the colour of your choice. The steel is powder-coated in the colour of your choice (available from 6 pieces).

Colour options
Our standard colours are:
black | red | yellow | silver

Features	
Item-No.	10002247 red 10002248 silver 10002249 yellow 10002250 black
Weight	27,5 kg
Measurements	190 cm x 16 cm x 40 cm
Accessories (included)	Angle sign, first aid kit, first aid cabinet, holder for fire extinguisher, list holder with display boards
Miscellaneous	5 holes in base plate for floor fixings or castors

myLean cleanTower Mobile

The myLean cleanTower Mobile offers you a mobile and space-saving solution for storing your individually required cleaning utensils. The myLean cleanTower Mobile impresses with its three attached quick-release hooks, which make it quick and easy to attach the cleaning accessories.

It is also ideal for making optimum use of unused wall space. Thanks to the 4 attached castor wheels it can always be moved to the desired area of use and optionally offers enough space for a single, double or triple waste bin, as well as for your individually required accessories.

The myLean cleanTower Mobile – space-saving and mobile for more order and cleanliness

You can also simply order your myLean clean-Tower Mobile in the colour of your choice. The steel is powder-coated in the colour of your choice (available from 6 pieces).

Colour options
The frame of the cleanTower mobile is always silver. Our standard colours are: silver | red | yellow | black

Features

Ergonomic Floor mats by myLean

The human body is not made for hours of standing, turning or walking on hard floors. The consequences are joint and spinal problems, which can become serious complaints in the long term. myLean floor mats keep the body in constant, barely noticeable motion. Blood circulation is stimulated and standing, turning and walking are possible without pain in the long term. With less downtime, both the employee and the employer benefit from myLean floor mats.

Polyurethane Floor mats

myLean Polyurethane mats offer maximum comfort, top quality and elasticity. Specially developed Polyurethane and the high-density outer skin ensure a long service life. The floor mats can be safely laid out in damp and wet areas.

Rubber Floor mats

Variations myLean rubber mats

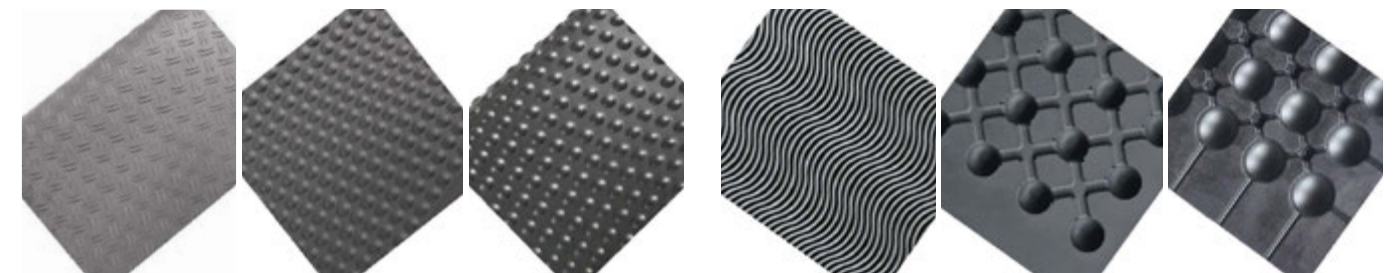

- Synthetic rubber made from nitrile (NBR): Resistant to oil, cooling lubricants and chemicals, i.e. long service life
- SBR mats: low abrasion
- Natural rubber (NR): highly elastic, good tear resistance, low-wear
- myLean rubber compounds consist of a mixture and construction specially tailored to the area of application

The right floor mat for every application and every area of use!

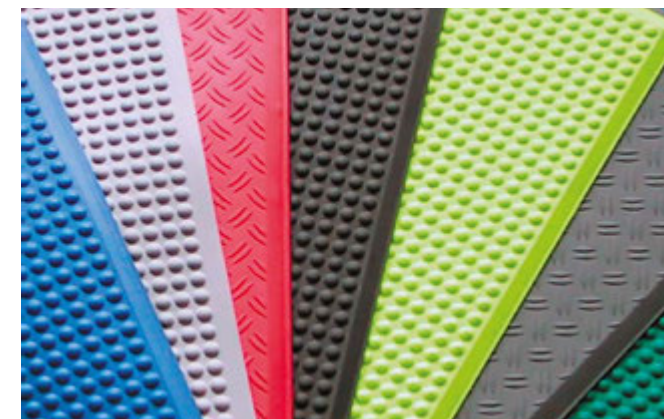

With different surfaces and different undersides, the floor mats can be selected for the appropriate load and application. We produce customer-specific floor mats with special colours and individual shapes.

Customise your floor mat specifically for your needs

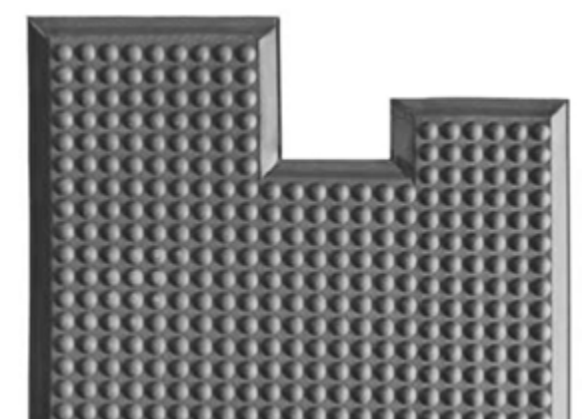

Various surfaces

Various subpages

Special colours

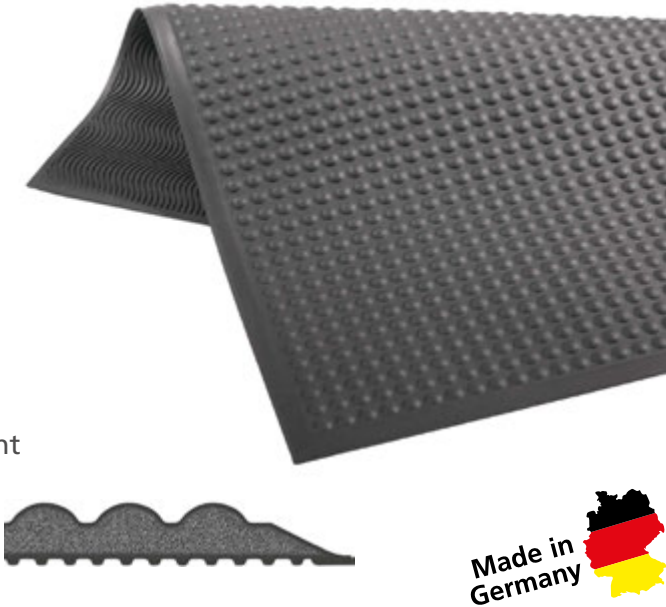

Different shapes

Soft Flow a (30001081)
Flow A (30001076)

Ergonomic floor mat – For standing and walking workstations in wet and dry areas.

- Extremely elastic
- Hard-wearing mat with nub surface
- Easy to clean
- Corrugated, grooved underside profile - slip-resistant
- Long service life due to thick, highly compressed outer skin

The Flow floor mat is designed for heavy-duty usage. (multi-shift workstations)

Features

Hydrolysis-resistant, slip-resistant R10, surefooted, cold-insulating, stimulates blood circulation, CFC & HCFC-free, shock-absorbing, low-wear, limited resistance to acids and oils, largely resistant to chemicals, bases and alkalis

Application areas

Assembly lines, at workbenches and machines, sorting and packaging systems or behind sales counters (offices, banks, counters), etc.

Versions

- **Soft Flow a** 10⁹ Ω
Standard features
antistatic/low charge
- **Flow A** 10⁷ Ω
ESD electrostatically dissipative

Features	
Material	Polyurethane, highly elastic, with thick highly compressed outer skin
Surface	Nubs
Bottom surface	Groove profile
Colour	Anthracite/ Graphite-grey
Measurements	ca. 60 x 90 cm, plus 2 cm Inclined approach, custom sizes available
Height	ca. 15 mm
Weight	ca. 2,5 kg
Warranty	3 years (on material and workmanship with proper use, excluding wear and tear)

Soft Flat a (30001083)
Flat A (30001079)

Standing, walking and turning workstations (with many turning movements). Suitable for dry and damp areas.

- Easy to drive on
- High standing comfort due to wavy grooved profile
- Grooved profile on the bottom surface prevents floating in wet conditions
- Long service life thanks to thick, highly compacted outer skin

The Flat floor mat has been developed for heavy-duty usage. (multi-shift workstations)

Features

Slip-resistant, hydrolysis-resistant, anti-slip R10, CFC and HCFC-free, cold-insulating, low-wear, stimulates blood circulation, largely resistant to chemicals, bases and alkalis, limited resistance to acids and oils

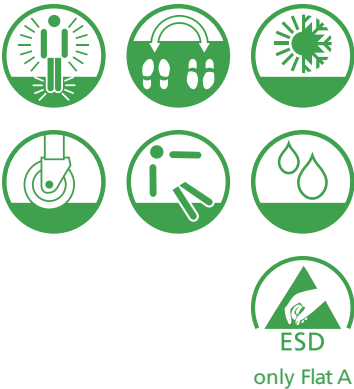

Application areas

Assembly lines, workbenches, machines, order picking systems, sales counters (offices, banks, counters), etc.

Versions

- **Soft Flat a** 10⁹ Ω
Standard features
antistatic/low charge
- **Flat A** 10⁷ Ω
electrostatically dissipative

Features	
Material	Polyurethane, highly elastic, with thick highly compressed outer skin
Surface	Ripple structure
Bottom surface	Groove profile
Colour	Anthracite/ Graphite-grey
Measurements	ca. 60 x 90 cm, plus 2 cm Inclined approach, custom sizes available
Height	ca. 12 mm
Weight	ca. 2,5 kg
Warranty	3 years (on material and workmanship with proper use, excluding wear and tear)

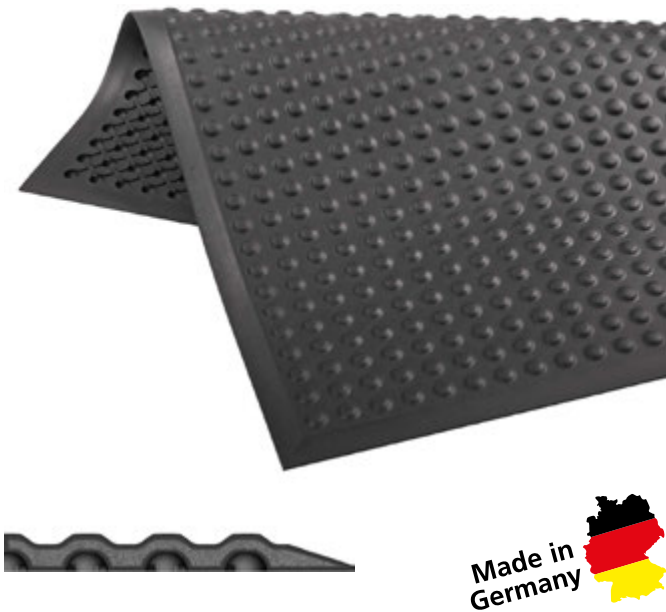

— Smooth

Smooth a (30001072)

Standing, walking and turning workstations thanks to flattened nubs. Suitable for dry and damp areas.

- Enormously cushioning due to material and special construction with air cushion effect thanks to hollow nubs
- Stimulates blood circulation
- Relaxed and fatigue-free standing thanks to flattened nubs
- Long service life thanks to thick, highly compressed outer skin

Developed for heavy-duty usage.
(Multi-shift workstations)

Features

Hydrolysis-resistant, slip-resistant R10, slip-resistant, cold-insulating, stimulates blood circulation, CFC and HCFC-free, shock-absorbing, low-wear, limited resistance to acids and oils, largely resistant to chemicals, bases and alkalis

Application areas

Walking, standing & turning workstations, assembly & packaging lines, machines, sales & checkout counters, laboratories, sorting systems, etc.

Versions

- **Smooth a** 10⁹ Ω

Standard features
antistatic/low charge

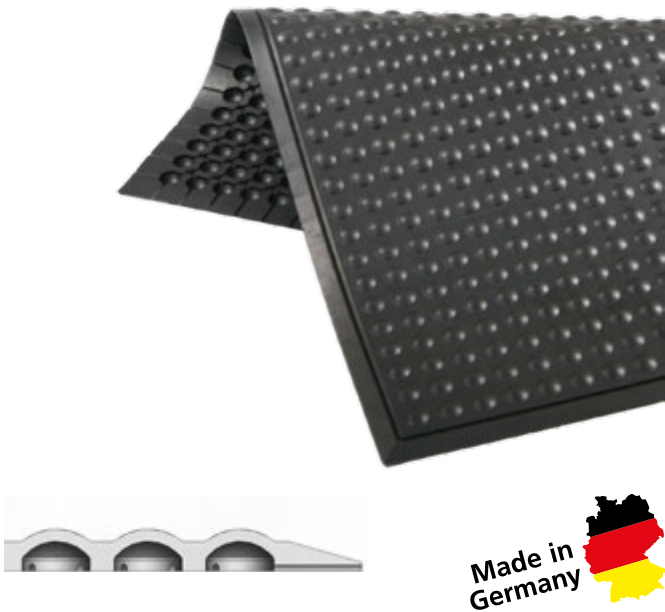

Features	
Material	Polyurethane, highly elastic, with thick highly compressed outer skin
Surface	Flattened nubs
Bottom surface	Hollow nubs with drainage channels, anti-slip
Colour	Anthracite
Measurements	ca. 60 x 90 cm, plus 2,5 cm Inclined approach, custom sizes available
Height	ca. 14 mm
Weight	ca. 2,6 kg
Warranty	5 years (on material and workmanship with proper use, excluding wear and tear)

— Luxury

Luxury S (30001085)

All-round floor mat – Ergonomic nitrile mat for machining areas.

- Comfortable walking, standing and turning
- Extremely hard-wearing floor mat
- Drainage channels between the nubs for better drainage of liquids
- Practical for shift operation in dry and wet areas
- Can be accessed with pallet trucks and replenishment vehicles
- Luxury Sg with signalling effect at the edge

Features

Surefooted, anti-slip, cold-insulating, stimulates blood circulation, hydrolysis-resistant, resistant to chemicals, oil and cooling lubricants, easy to clean, low-wear

Application areas

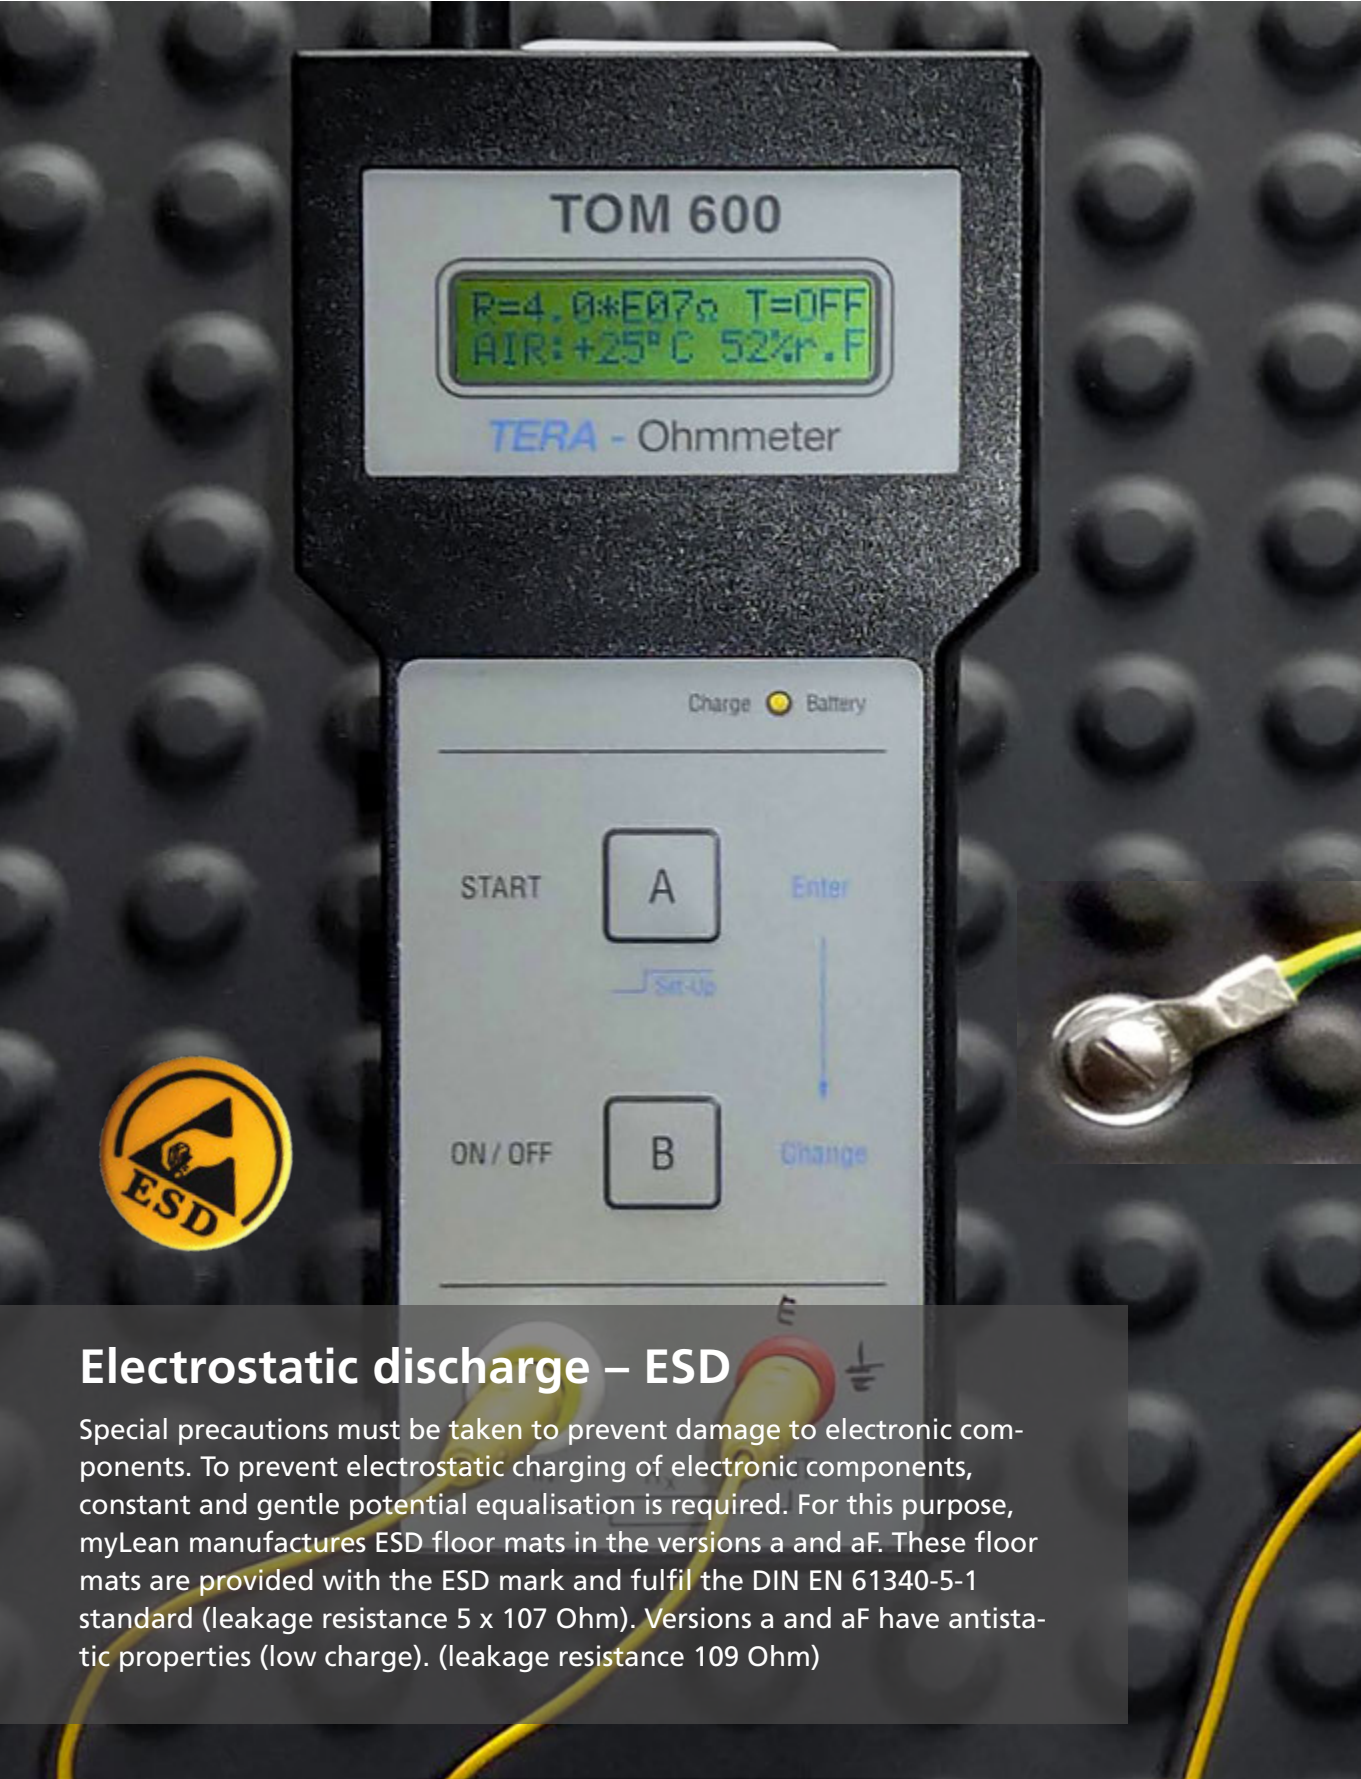

CNC machines, lathes, cleaning systems, milling systems, machining areas, welding workstations, workstations with cooling lubricants, etc.

Leakage resistance

- 10⁹ Ω antistatisch/low charge

Features	
Material	Nitrile rubber (NBR)
Surface	Flattened nubs
Bottom surface	Hollow flat nubs with drainage channels
Colour	Luxury S: black Luxury Sg: black with all-round yellow rim
Measurements	Ca. 60 x 90 cm, plus 2,5 cm Inclined approach, custom sizes available
Height	ca. 14 mm
Weight	ca. 5,0 kg
Warranty	5 years (on material and workmanship with proper use, excluding wear and tear)

Icon explanation

-  Slip-resistant, even on the floor mats bottom surface
-  Ergonomically relieving
-  Fire resistant DIN B1-4102-14
-  Trafficable
-  Resistant to oil, coolants and lubricants
-  Drainage
-  Rotating, workplaces with activities involving frequent rotating movements
-  Suitable for wetness
-  Heat/cold insulating
-  Heat resistance up to 120° C
-  ESD – electrostatic discharge to DIN EN 61340-5-1: $5 \times 10^7 \text{ }\Omega$

ADHESIVE PROJECTING SPRAYING

LongLife floor markings – Suitable for the most extreme demands

myLean GmbH is a manufacturer of floor markings. myLean LongLife floor markings were developed in our own laboratory for the most extreme requirements. The floor markings are produced in our own production facility in Germany. Whether for walkways, danger zones or storage areas, the right labelling increases work safety and makes it easier to comply with regulations. Correct labelling gives you a good overview of the availability of your goods, also with regard to stock reduction.

LongLife floor markings

Special features

myLean® floor markings can be used for almost all indoor surfaces. Our floor markings are self-adhesive and therefore quick and easy to apply. LongLife Floor markings from myLean are „forklift-proof“, even against turning on the marking.

Recommended markings

Colours and shapes of floor markings provide clear visual cues.

We offer you various products for ideal, robust and compliant floor markings. Storage and functional areas, traffic routes as well as work and safety areas are visually emphasised.

Recommendation for colour coding

-  **Main and side routes**
Design: cut-to-size or strip goods
-  **Danger zones**
Design: cut-to-size or strip goods
-  **Raw material/delivery areas**
Design: cut-to-size or strip goods
-  **Other storage spaces**
Design: cut-to-size or strip goods
-  **Finished material/delivery area**
Design: cut-to-size or strip goods
-  **Empties**
Design: cut-to-size or strip goods
-  **Rejects/defective parts**
Design: cut-to-size or strip goods

-  **S51 Longitudinal markings**
Longitudinal markings clearly demarcate individual areas and help to structure your company. Clearly marked areas of drive-ways and walkways or storage and production areas and reduce the risk of accidents in companies. Clearly marked areas increase the efficiency of a company. Longitudinal markings in defined colour assignments are used to clearly separate areas from one another.
-  **Symbols**
Symbols are used to visualize and clearly assign areas, e.g. clearly marked storage areas minimize the risk of confusion and also increase the efficiency of your company. Symbols are used in defined colour assignments to clearly distinguish areas from one another.
-  **Mandatory signs**
Command signs improve occupational safety in your company and indicate how to behave in designated areas. The design is standardized in accordance with ASR A1.3 and draws employees' attention to hazards.
-  **Prohibition signs**
Prohibition signs prohibit certain actions in company areas and thus contribute to safety in companies. The design is standardized in accordance with ASR A1.3 and actively helps to prevent accidents at work.
-  **Warning and information signs**
Warning and information signs are standardized in accordance with ASR A1.3 and alert employees to hazards such as industrial trucks and highly flammable materials in designated areas.

LongLife tape goods | LongLife connection angle 45° & 90°

Our established and long-tested Long-Life tape is extremely resistant to forklift trucks and abrasion. The backing material of our floor markings is dyed through, which prevents abrasion. The specially developed high-performance adhesive guarantees extreme adhesion on almost all indoor surfaces. Our 90° and 45° corners are prefabricated corner elements for creating corners on LongLife strip products. They are available in nine different standard colours.

- Common 55 colours

Layer structure material
The tape is printed on the reverse side. The colour application cannot be rubbed off the front, as it is protected by the film. A high-quality adhesive layer is used for LongLife floor markings.

Floor markings

— LongLife tape goods: ESD

LongLife tape goods ESD | customised | anti-slip

- ESD**
ESD Floor markings are self-adhesive and mark ESD areas. The ESD floor markings themselves are not conductive.
- Customised**
Customised floor markings are self-adhesive and are printed according to your specifications. Customised tapes from our company are printed on the bottom surface. This prevents abrasion of the colour.
- Anti-slip**
Anti-slip floor markings are self-adhesive and prevent any slipping thanks to their sanded surface. For use on steps or in machining operations with a lot of cooling lubricant.

Safety signs for doorways
LongLife floor stickers for more safety!

Floor stickers with clear safety signs help to make dangers in doorways visible and ensure safe access. They offer a simple and effective solution to draw attention to potential hazards and signs.

LongLife Floor signs doorways

The LongLife floor signs for doorways ensure greater safety by clearly marking danger zones. Thanks to their high visibility and non-slip surface, they provide effective orientation for employees and visitors. They are durable, easy to apply and ideal for industry, warehouses or public buildings. In this way, they actively contribute to accident prevention and safe access.

Precise & long-lasting markings – Safety with the myLinienlaser!

A myLinienlaser ensures precise and permanent marking of walkways, driveways, stop lines or danger zones – even in very dusty and dirty environments. Thanks to its high abrasion resistance, the marking remains safe and clearly visible. Different areas can be clearly demarcated by selecting different colors. This creates a structured and safe working environment with optimum orientation.

	750 mW	90° Degree	30003079				

Danger warning

The top priority when using line lasers in the commercial sector is laser safety for users and observers. myLine lasers are considered "extended sources" according to TROS and require fewer safety measures than point lasers. The necessary safety distance depends on the deflection angle: the greater the angle, the shorter the distance. The laser color is irrelevant as long as the laser is visible. A table supplied with the laser indicates the minimum distances required to comply with laser safety class 2.

An example illustrates the requirements: With a laser power of 750 mW and a deflection angle of 90°, the safety distance is 1300 mm. Add to this 2000 mm for the viewing size, which results in a minimum mounting height of 3320 mm in relation to the laser exit. In many cases, a detailed analysis of the final installation may allow shorter distances. A specific risk assessment can also contribute to safety. For a more precise classification, a detailed inspection should be carried out on the respective laser installation.

Precise floor markings with myLinienlaser – for the best safety and efficiency

myLinienlasers are specially developed floor markers for the projection of virtual, abrasion-resistant line markings on industrial floors, in warehouses or other buildings. The laser unit is mounted overhead on a hall ceiling or wall and draws a clearly visible, wide line of light on the floor. A myLean line laser thus marks walkways, routes, stop lines or danger zones safely, abrasion-resistently and permanently, even in very dusty and dirty environments. Different colors can be used to mark any type of area.

mySpot LED-Projector

The ultimate solution for signage in challenging environments!

- Projection of still and rotating images
- Abrasion-resistant for long-lasting use
- High-power LED in high definition
- Variety of applications
- Dustproof and protected against moisture
- 360° rotating lens with switch
- Robust and durable wall bracket
- Easily interchangeable motifs
- High energy efficiency

Floor markings from myLean – Long-term visibility – maximum safety!

Our sprayed floor markings offer excellent visibility for safety in all indoor areas. Whether in spacious warehouses or on busy workshop floors, myLean’s floor markings ensure clear visibility and long-lasting adhesion. Our service utilises ecological spraying machines for durable, brilliant markings that increase safety and efficiency. With a range of options customised to your needs, myLean transforms your industrial space into a safe working environment.

Contact

Tel. 07024 466 27 0 | info@my-Lean.com

Customised sprayed floor markings from myLean for especially high requirements!

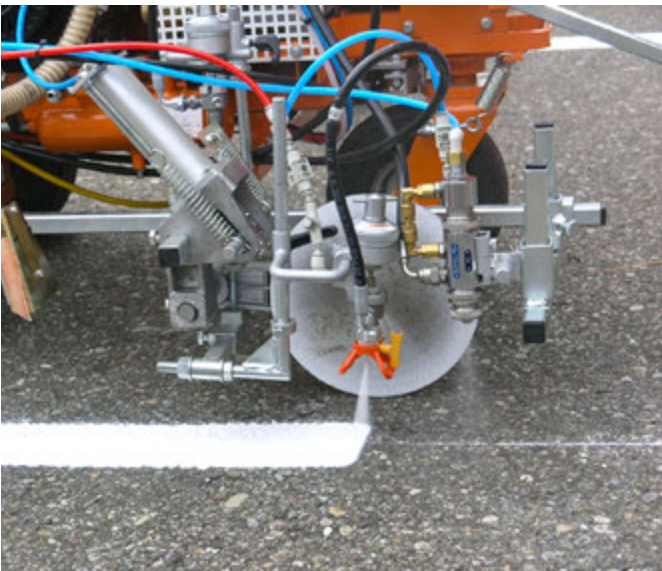

Logistics centres, warehouses and industrial halls are places that are frequented by a large number of road users. To ensure the safety of these environments, it is essential that traffic routes are marked with clearly visible colours. Thanks to their low susceptibility to dirt and an anti-slip surface, our sprayed floor markings ensure a perfect result.

Features

- All traffic colours
- Extremely resilient
- Scratch and impact resistant – extreme floor adhesion
- UV and weather resistant
- Epoxy modified HS paint (1 K & 2 K material)
- Polyurethane paint
- Thick film material: cold plastic & thermoplastic

Service process:

- Contact by customers to discuss the detailed enquiry.
- Assessment and recording of the spatial conditions.
- Based on the information gathered, technical advice can be provided at the customer’s request.
- Based on the assessment myLean prepares a detailed offer.

Customized signage with vinyl lamination

Individual design: custom-made designs to match your corporate identity. Choose from a variety of high-quality materials such as acrylic or metal to represent your brand in the best possible way, whether for indoor or outdoor use, we create durable signage that can be used in a variety of ways as directional signs, door signs or company signs. Our experienced team also ensures professional installation directly on site so that your signage is not only visually appealing, but also functional.

- Features**
- High-quality vinyl foils:
 - Printed or as a cut plot
 - A wide variety of substrates:
 - e.g. aluminum composite, metal, acrylic glass, etc.
 - For indoor and outdoor use
 - UV and weather resistant
 - Scratch and impact resistant
 - Easy care

Service process:

- Customers contact us to discuss their detailed request. Based on the consultation, we create an individual concept and plan the best materials and sizes for your signage.
- After approval, the signage is manufactured to the highest quality and precision – using modern production techniques and durable materials.
- The finished signs are delivered on time and, if required, can be installed safely and precisely in the desired location by our specialist staff.

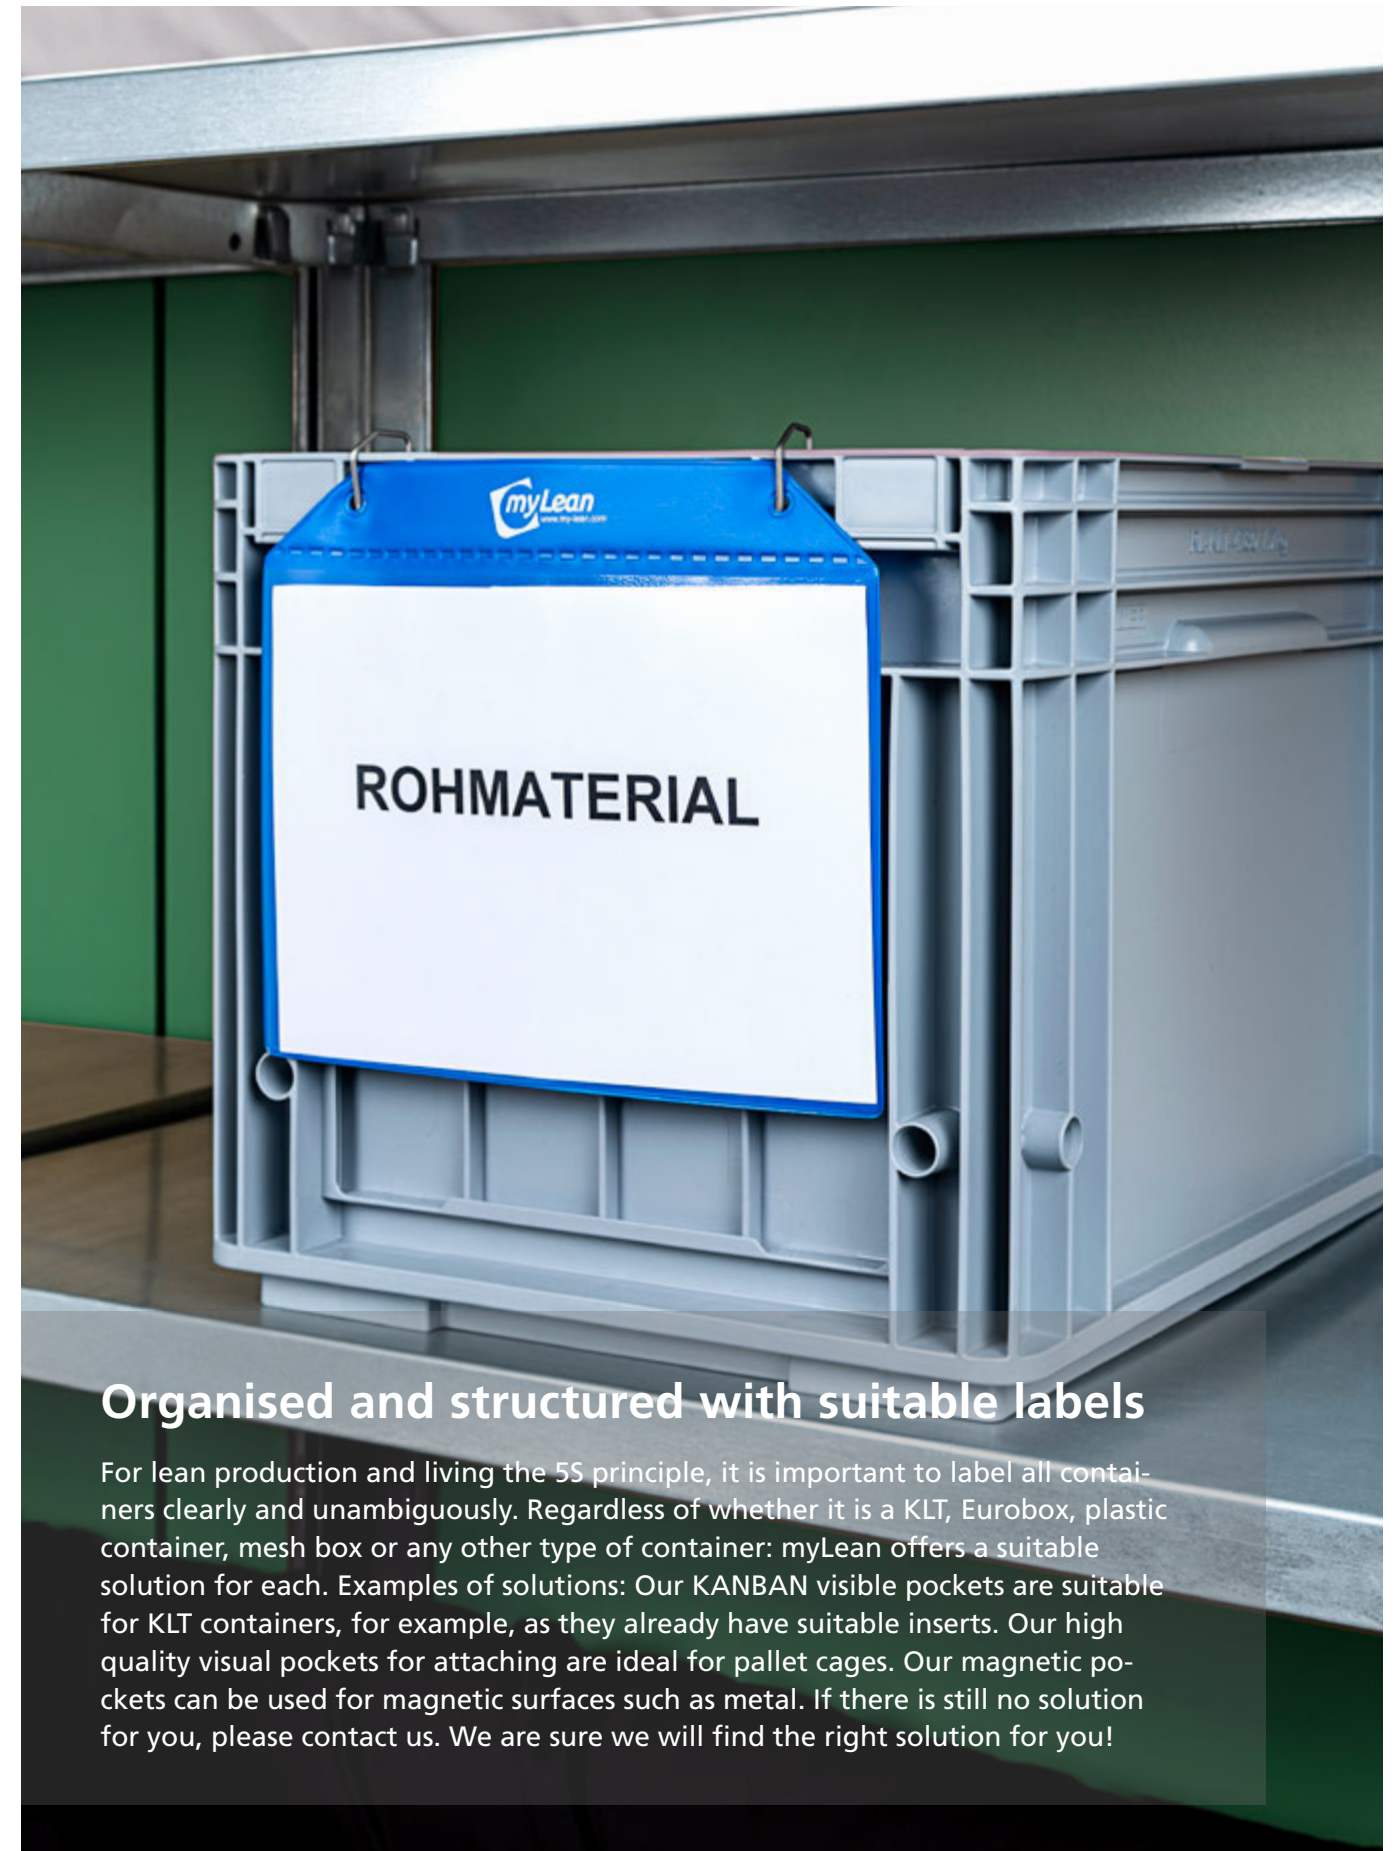

Custom business signage by myLean –
Signage for indoor and outdoor use:
Signposts, door signs and company signs

Give your company a professional image with customized signage solutions. High-quality materials, modern design and precise installation ensure that your message is guaranteed to be seen. Discover the perfect signage for your brand now!

Organised and structured with suitable labels

For lean production and living the 5S principle, it is important to label all containers clearly and unambiguously. Regardless of whether it is a KLT, Eurobox, plastic container, mesh box or any other type of container: myLean offers a suitable solution for each. Examples of solutions: Our KANBAN visible pockets are suitable for KLT containers, for example, as they already have suitable inserts. Our high quality visual pockets for attaching are ideal for pallet cages. Our magnetic pockets can be used for magnetic surfaces such as metal. If there is still no solution for you, please contact us. We are sure we will find the right solution for you!

— Visible pockets to attach

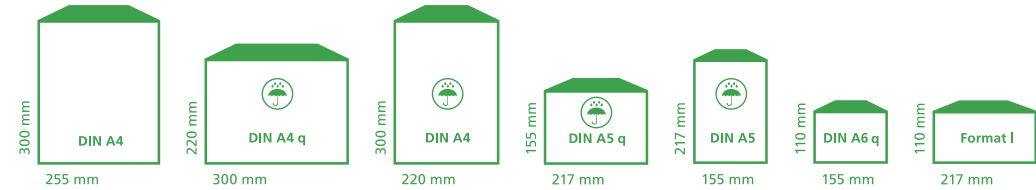

Visible pockets to attach

There is no suitable way to attach labels to many containers. This can be remedied with the clip-on visual bag. These are available in various DIN formats and colours and optionally with a rain flap.

Always keep an overview with the warehouse labels from myLean

A well-organised and labelled warehouse is the be-all and end-all of lean production these days. myLean offers you magnetic warehouse labels in all designs, colours and sizes. By simply replacing the paper labels in the magnetic labels, you can decide for yourself how to label your goods and shelves quickly and easily. We are happy to offer you customised products on request.

C-Profiles

The magnetic C-Profiles are ideal for warehouse labelling or as header and name strips on planning boards. You can use the magnetic C-Profiles to label your goods and the cards simply move with you when you move house. Thanks to the supplied labelling label and transparent cover, the label always stays clean and can be reused.

— Transparent magnetic labels, open at the side

Transparent magnetic labels,
open at the side

The transparent magnetic label including labelling board creates structure in your warehouse. Thanks to the full-surface magnetic back, it can be attached anywhere in the warehouse. The integrated transparent cover protects the labelling board from dirt and keeps the label clean. The outer width of the signs is approx. 6 cm more than the labelling area due to the welded joints.

VE = 10 pieces

— Transparent magnetic labels, open at the side & top

Transparent magnetic labels, open at the side & top

This transparent magnetic label is fully magnetic on the back. Ideally suited for quick and easy replacement of the signs, thanks to the opening at the side as well as at the top. A special highlight is the coloured marking strip at the top and bottom. This allows you to colour-code your goods. The sign can be used again and again and is advantageous for changing labelling. The overall width of the sign is sized by the 5 mm wide orientation strip. Supplied without paper labels.

Organised planning & overview of your processes with myLean magnetic and whiteboards

Our magnetic and whiteboards help you every day with planning your assignments, important messages or as information boards. You can also use the board as a beamer or projector background. With the numerous accessories available, such as magnets or pens, you can display important information or processes visually and attractively.

Well visualised with myLean magnet boards

The myLean magnetic board consists of a white lacquered magnetic board and is edged with an aluminium profile. The (optional) four swivel castors with brakes make it easy and safe to move the magnetic board to the desired location in your company. Of course, the magnetic board is also available with adjustable feet.

Customised myLean magnet board

Easily design your own customised visual board using a combination of one or more individual boards. Our magnetic board is available with rolls, with adjustable feet or with a bracket for wall mounting.

The magnetic boards can be ordered in 3 different versions:

- with wall mount (W)
- with rack on rolls (R)
- with frame on adjustable feet (F)

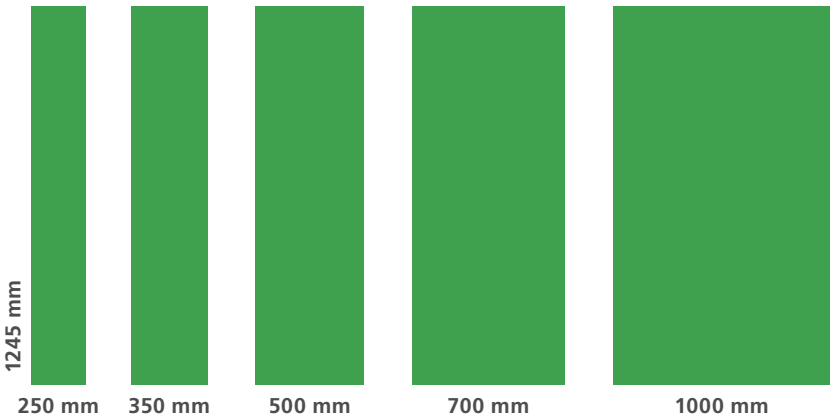

Rack on rolls (R)

Rack on adjustable feet (F)

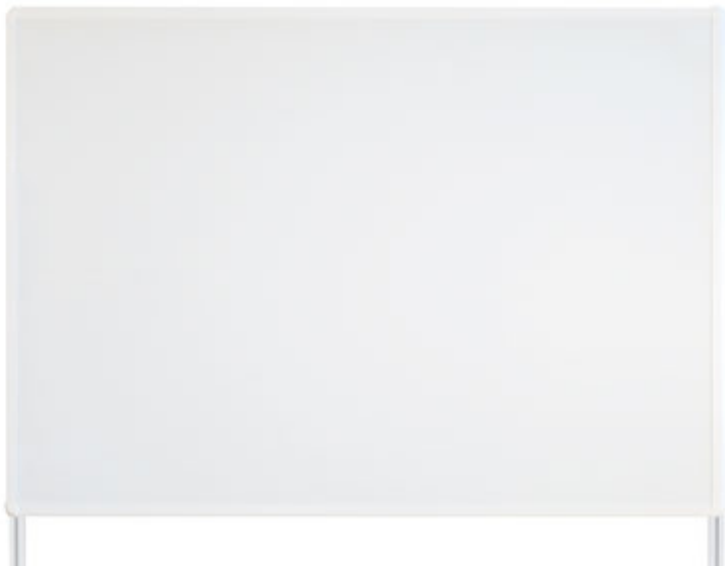

Z. B. 1245 mm x 250 mm in combination with 1245 x 350 mm

First select the size of your board:

– –

MB for magnetboard Total width: 950 mm Feet: F (Adjustable feet) | R (Castor feet) | W (Wall mount)

myLean whiteboard

The myLean whiteboard consists of a white, magnetic and writable surface and is surrounded by an aluminium frame. Our whiteboard is available with rolls, with adjustable feet or with brackets for wall mounting. By linking the individual whiteboards together, you can realise different set-up options.

The magnetic boards can be ordered in 3 different versions:

- with wall mount (W)
- with rack on rolls (R)
- with frame on adjustable feet (F)

myLean whiteboard with 4-colour print

Design your customised whiteboard with your desired imprint for improved employee communication and illustration. This whiteboard is also magnetic and can be labelled. The aluminium frame is available in white or silver anodised, including mounting brackets for wall mounting and corner brackets. The print image in the background can be provided by you or customised by our agency.

Magnetic ring binder

Are you fed up with the constant chaos of sheets on your shelves? - Then the magnetic ring binders are just right for you! If necessary, you can easily remove individual sheets and, thanks to the opening lever, you can do this with just one hand. Rubber magnetic feet ensure a secure and firm hold. These are gentle on surfaces and leave no marks when removed.

VE = 1 piece

Item-No.	Number of rings	Measurements (mm)

	30002766	30002770	 yellow

Slip-in shelves (magnetic)

Keep your standboard organised with the transparent insert compartments from myLean. You can insert leaflets, information sheets or documents, for example, and have them directly at eye level (depending on how they are mounted). Simply drill a hole in the desired position on your magnetic board or simply attach with the magnetic strips on the back and create a better overview for your employees.

Material: Polystyrol | Colour: transparent

Magnetic viewing visible pockets, writable

The labelling frames allow important documents, such as cleaning lists or maintenance schedules to be labelled directly. The magnetic strips on three sides on the back ensure strong adhesion and at the same time make it easy to change documents thanks to the one-sided opening. The magnetic frames are available in various colours and therefore help you to label different topics.

The right material – at the right time, in the right quantity – at the right place

The diversity of today's production processes requires a reliable supply of materials. Station systems and parking bays enable the targeted provision of rolling goods. Signage/labelling simplifies allocation and creates process reliability. Thanks to the simple assembly and freely expandable rails made of high-quality aluminium, the first-in, first-out principle can be implemented with certainty. Simply screw or glue the rails to the floor and easily extend your lane to your desired length using the connecting rail. We are happy to provide you with complete solutions for the provision of materials, including the rail system, aluminium profile construction and signage.

Supply trolley:

30004003	2000 mm – black

Parking rails

Safe parking with the myLean parking rail. Use the myLean parking rail to position your floor rollers and pallet trolleys. The parking rail made of high-quality aluminium allows you to fill or empty the container easily and safely without it rolling away. Simply stick the rail to the floor at any point.

Item-No.	Parking rail high-high (12/12 mm) in mm incl. 4 end pieces
30002605	400
30002606	800
30002607	1200
30002608	2400

Item-No.	Parking rail low-low (6/6 mm) in mm incl. 4 end pieces
30002613	400
30002614	800
30002615	1200
30002616	2400

Item-No.	Parking rail low-high (6/12 mm) in mm incl. 4 end pieces
30002609	400
30002610	800
30002611	1200
30002612	2400

Ground roller Dolly 64 – 300

The trolley has a load capacity of 300 kg and can be linked together using the innovative uni-Link function. When stacked on top of each other, they can be stowed away to save space. Depending on requirements, it can be fitted with different wheels and other accessories.

- Floor trolley with uni-Link
- Castors with parking brake
- Fast cross-stacking
- 4x abrasion-resistant swivel castors

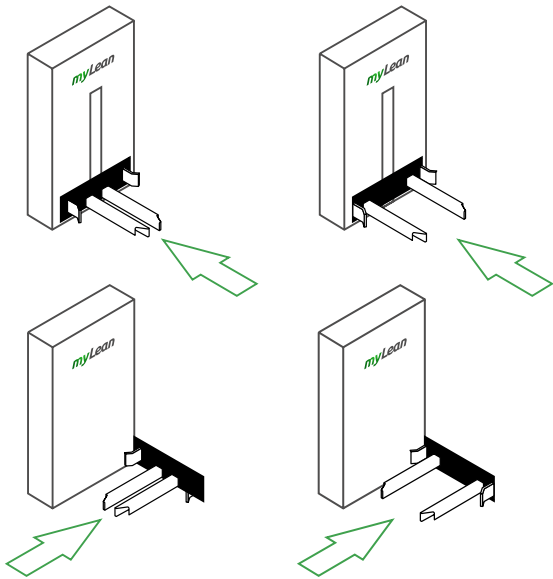

Item-No.	Measurements (L x B x H)	Rolls	Material	Max. Load
30004322	600 x 400 x 173,5 mm	4 Swivel castors Material: Galvanised steel Roller diameter: 100 mm	High impact-resistant polypropylene	300 kg

Crate lifters

The electric lifting device is equipped with a control panel with an emergency stop button or sensory height detection/light sensor (optional), schuko-plug and CE labelling. The surface is powder-coated or galvanised. Sturdy castors and handles are available on request for safe manoeuvring. Alternatively, the pneumatic version can be operated using a hand lever.

All versions are also available at 6 bar or 230 V.

Item-No.	Crate lifter	Lifting height in mm	Load capacity in kg
40001003	Front longitudinal loading	720 – 920	200 – 500
40001004	Front transverse loading	720 – 920	200 – 500
40001005	Lateral longitudinal loading	720 – 920	200 – 400
40001006	Lateral transverse loading	720 – 920	200 – 400
40001007	Double – loading sideways lengthwise	720 – 920	200
40001008	Tandem – loading sideways lengthwise	720 – 920	200 – 300
40001009	Tandem – lateral transverse loading	720 – 920	200 – 300

- 142 General information
- 143 Customised profile solutions

Profile construction from experts

Design and determine your individual, ergonomic and flexible workstation systems or profile products. Whether workstations for material workstations or profile weighing systems, myLean makes your ideas come true. Production is completely customised to your wishes and requirements. Trained personnel and our expertise make the myLean profile products a price-performance hit.

We produce the perfect profile construction for you!

In our profile workshop, we use the profile construction kits established on the market to produce customised profile construction solutions. Benefit from our universal approach and our many years of experience in profile construction.

From the idea to customised product solutions

Our range of services includes consulting and planning, supported by our CAD department, as well as the realisation of the profile solution.

Please contact us for your individual aluminium profile system.
